# AN ENVIRONMENTAL ADVISORY AND SERVICES FIRM BUILT FOR DELIVERY.

Selorin supports owners, developers, contractors, and operators in meeting environmental requirements and improving environmental performance across the full project lifecycle — combining regulatory advisory, technical studies, field monitoring, and sustainability services under a single accountable scope.

## OUR POSITIONING

Positioned as a regionally credible environmental partner — combining local regulatory depth with the delivery standards clients expect from leading international consultancies.

### WHAT WE DO

- Environmental compliance & permitting
- Technical studies & impact assessment
- Monitoring, ESG & clean energy advisory

### WHO WE SERVE

- Developers, contractors & operators
- Government entities & authorities
- Investors & lenders

### HOW WE WORK

- Scope built around your decision
- Data-led baselines, not assumptions
- Direct access to the technical team

## WHERE WE'RE GOING, AND WHY IT MATTERS.

### VISION

To be the trusted environmental partner behind the Kingdom's most significant developments — recognised for insight that holds up to scrutiny and decisions that stand the test of time.

### MISSION

We translate complex environmental requirements into clear, defensible action — integrating compliance, studies, monitoring, and sustainability advisory under one accountable scope.

SIX INTEGRATED  
CAPABILITY AREAS.

ENVIRONMENTAL  
COMPLIANCE

- Environmental Permits
- Permit Renewal & Amendment
- Environmental Classification
- Environmental Compliance Support
- Regulatory Consulting

ENVIRONMENTAL  
STUDIES

- Environmental Impact Assessment (EIA)
- Environmental Management Plans (EMP)
- Environmental Audit
- Environmental Risk Assessment
- Environmental Rehabilitation Studies

ENVIRONMENTAL  
MONITORING

- Air Quality
- Noise Monitoring
- Soil
- Water
- Emission Sources
- Environmental Monitoring Reports

SIX INTEGRATED  
CAPABILITY AREAS.

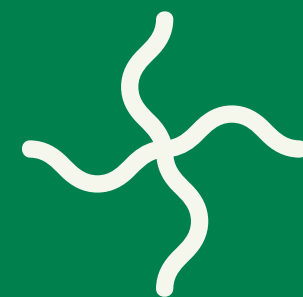

SUSTAINABILITY &  
ESG

- ESG Advisory
- Carbon Footprint
- GHG Emissions
- Sustainability Strategy
- Environmental Performance
- Circular Economy

WASTE  
MANAGEMENT

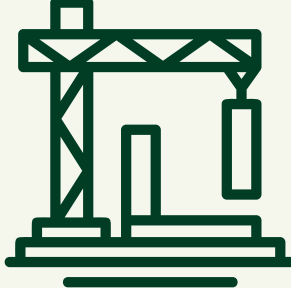

- Waste Management Plans
- Hazardous Waste
- Non-Hazardous Waste
- Waste Classification
- Waste Reduction & Recovery

GREEN BUILDING  
& CLEAN ENERGY

- LEED
- Envision
- Green Building Advisory
- Renewable Energy Solutions
- Energy & Environmental Efficiency

## SECTOR CONTEXT CHANGES THE REQUIREMENT.

|                                                                                                                           |                                                                                                                        |                                                                                                                               |

WHAT SETS US APART.

- 01

**Regulatory Understanding**

How requirements are actually applied and reviewed in the Kingdom — not only how they're written.
- 02

**Technical Expertise**

Assessments and data produced to withstand technical review by the authority receiving them.
- 03

**End-to-End Solutions**

Compliance, studies, monitoring, and sustainability delivered under one accountable scope.
- 04

**Fast Response**

Direct access to the people doing the work, with turnaround aligned to project deadlines.
- 05

**Practical Solutions**

Recommendations designed to work within real programme, budget, and site constraints.

Real estate and mixed-use development, hospitality, ports & coastal projects.

INDUSTRIAL CORRIDOR

Eastern Region

Oil, gas & petrochemical operations, heavy industry & industrial cities.

# LET'S DISCUSS YOUR ENVIRONMENTAL REQUIREMENT.

Whether the immediate need is a permit, a study, a monitoring programme, or an ESG position — the useful first step is a short conversation about the constraint you're working against.
